## Our Service

- + Solution-oriented, competent consulting by our technically experienced employees
- + Personal and individual solution oriented support
- + Cross-product project management
- + Implementation of customer-specific requirements
- + Network of service providers

## Our Claim

- + Innovative products and customized solutions
- + High quality standards
- + Regular trend analysis
- + Great flexibility in product development
- + Long partnerships with suppliers

## Your Advantages

- + enrich as reliable partner
- + Optimized product design
- + R&D support in hardware and software
- + Suitable product selection
- + Focus on own core competence
- + Reduced development times through enrich support

Dr. Christiane Endrich

## „Where the future of electronics is at home“

**Quality and technical support: success through excellence** In today's world, quality is crucial to success - it is more than just an aspiration, it is the key to excellence. Those who focus on quality demonstrate their expertise. True to the motto: you can only be truly successful with first-class components. In times when long-term business relationships have become rare, we really rely on continuity and close co-operation. Not only with regard to suppliers, but also within the team. This enables us to guarantee competitive advantages and maximum product availability. A positive working environment also promotes efficiency and motivation in everyday life.

Our **endrich** marketing teams and sales staff are demanding, innovative and results-oriented. They have outstanding technical qualifications, which are complemented by many years of experience in design-in. Each product area is managed by **endrich** specialists and experts from our manufacturers. This means that we can always offer you the customised technical support you need.

Antonio Rodas

## „endrich: Innovation, proximity and service in perfection“

From our central warehouse in Nagold, we deliver to over 50 countries worldwide, always to the highest standards such as „just in time“, buffer and consignment stock, including customer-specific labelling for seamless traceability. Thanks to our customised and customer-oriented logistics, we can quickly get our products to where you need us. We maintain close contacts directly with the manufacturer and at the same time are always close to you, thinking locally and acting globally - in the truest sense of the word.

We see the procurement of innovative components and the development of customised system- and IoT-solutions not only as a challenge, but also as a key strength of our company. The highest level of service and quality are benchmarks for us, especially in an industry that is known for its global quality competition. Even when costs and product development are developing rapidly, we remain calm and make targeted use of our expertise. We do not leave our customers alone, but advise them at an early stage on suitable products and their possibilities - right through to sales. The advantages of family thinking are only possible in a family business like **endrich**. We are standing for personal dialogue from person to person and focus on long-term customer and manufacturer relationships, in line with our claim **„endrich - components of life“**.

## Endrich – Your Partner for IoT Development and Connected Technologies

**At endrich,** we have made it our mission to actively promote and are committed to actively advancing research and development in the field of IoT (Internet of Things). With this new focus, we are entering an era where we expand our long-standing expertise in the design of electronic components to comprehensive and holistic systems in the IoT domain. Through our own developments and in-depth know-how, we set new standards and shape the future of connected technologies.

**In an increasingly connected world, the development of intelligent products is crucial for success. Data is the foundation of every intelligent decision. At Endrich, we stand by our customers as a reliable partner to jointly develop innovative IoT solutions.**

Our **E-IoT ecosystem** offers a complete solution from a single source: from IoT nodes and smart sensors to gateways and cloud services – everything you need for your IoT development. We leverage our extensive experience to create tailored solutions that meet your specific needs.

## Endrich – Your Partner for Innovative IoT Solutions

### We offer:

#### Customized Development

Transform conventional devices into smart products with us. Our open IoT single-board computer design enables quick and flexible adaptations to fulfill your specific requirements.

#### Enhancement of Existing Systems

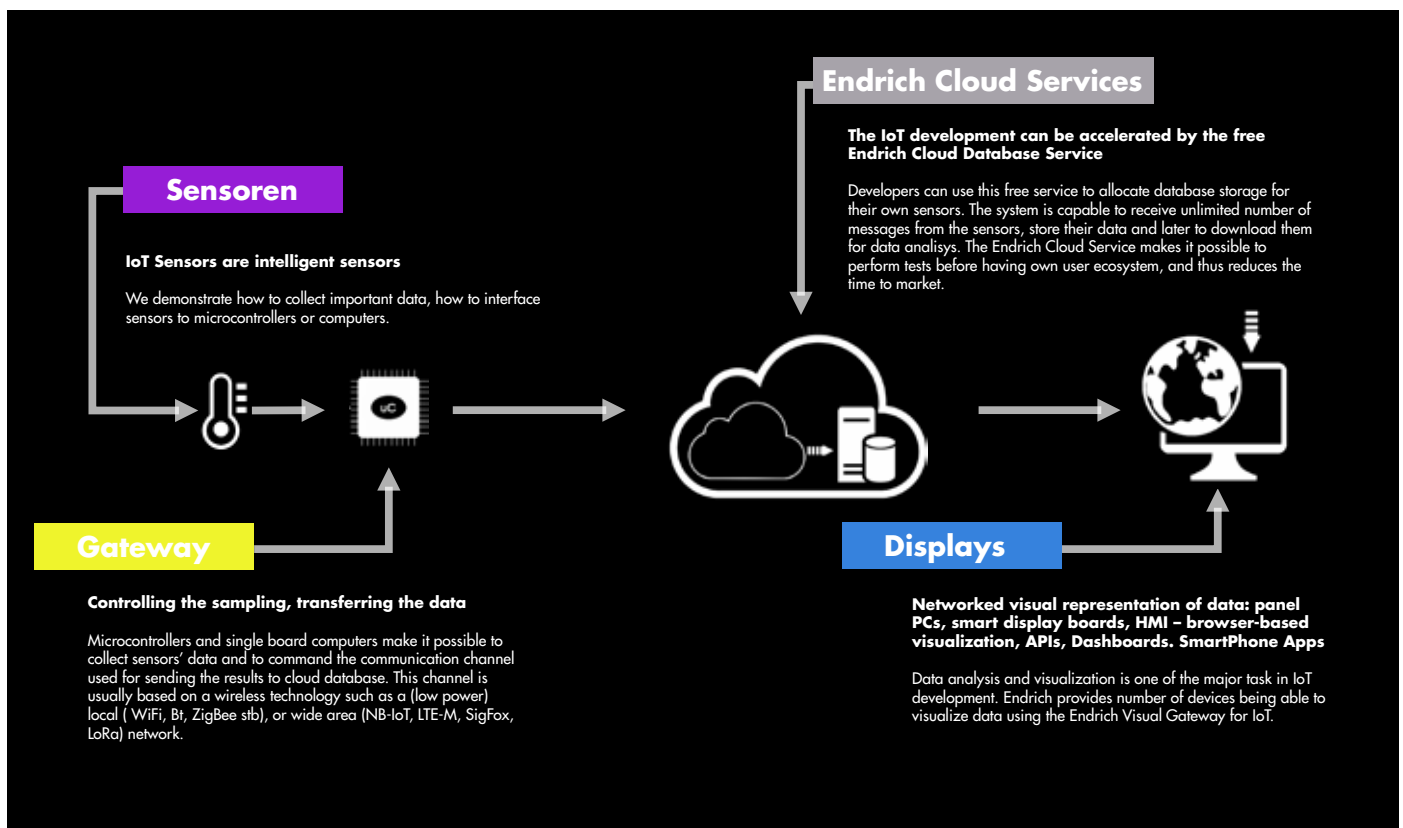

With our IoT extensions for Arduino, Raspberry Pi, and other single-board computers, we make your existing systems „IoT ready.“

#### Comprehensive Environmental Monitoring

Our solutions help you efficiently to monitor environmental parameters such as air quality and temperature, optimizing processes and creating safer working and living environments.

## e-IoT Concept

**One way to transmit data** is through smart sensors directly connected to the Internet. However, in many cases, a local wireless sensor network with a single Internet gateway is a better and more economical solution. We will discuss these options illustrated by the e-IoT ecosystem, which offers cellular LPWAN connectivity for direct sensor-database communication and recently utilizes NeoCortec's revolutionary NeoMesh protocol. This enables an ad-hoc, extremely energy-efficient sub-GHz mesh WLAN to collect data locally and transfer it to the Internet via a single access point.

**Industry 4.0** demands connected machines and systems that exchange and utilize data from sensors. Electronics based on microcontrollers (MCUs) take care of controlling the sensors and even allow for processing data directly on-site (edge computing) before transferring it to a database for analysis or visualization. The ecosystem that makes all this possible is called IoT (Internet of Things) and includes hardware components as well as software services like databases and visualization tools. Endrich's own **e-IoT system** provides a comprehensive solution from a single source. Multiple IoT nodes, smart sensors, gateway devices, and cloud services are available to our partners to initiate and advance their IoT development.

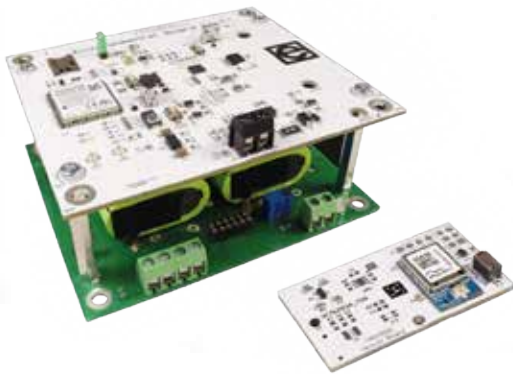

**„We make your device smart“.** Endrich operates in three key areas, the first of which focuses on transforming conventional devices into **SMART** devices. To this end, we have developed a RISC-V-based IoT single-board computer under an open hardware and software structure, with all technical data freely available to our customers. The device serves as an evaluation board to establish connections and conduct tests with the entire e-IoT platform. This can form the basis for a more specific product development.

**„Make your SBC IoT ready“.** The second area involves integrating other commercially available SBCs (single-board computers) such as **Arduino** or **Raspberry Pi**. Endrich offers extension shields to convert these MCU boards into fully-fledged IoT endpoints by adding sensors and communication capabilities.

**„We care about the environment“.** To provide a better environment for people, Endrich employs IoT technologies for monitoring environmental parameters.

The above-mentioned areas require the detection of operational parameters (e.g., machines and equipment, mainly for telemetry and predictive maintenance) as well as environmental parameters such as air quality, temperature distribution, and other important measures that describe the properties of a particular environment (e.g., in buildings, warehouses, cities, or residential areas).

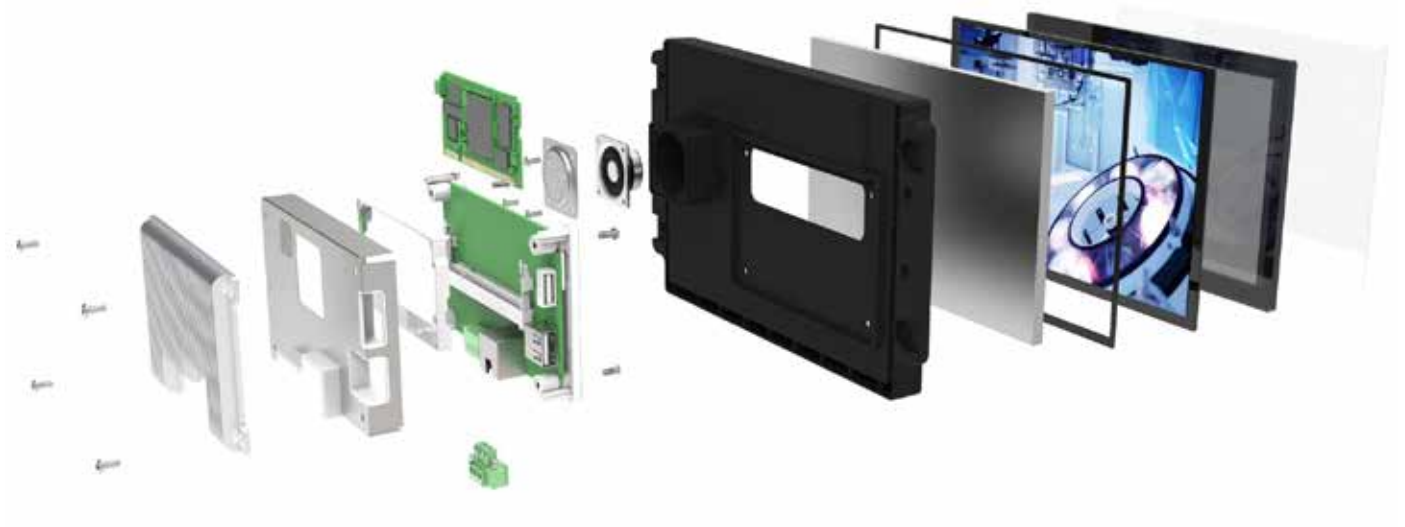

**Together towards success** At endrich, we understand that every development is unique. That's why we work closely with our customers to develop customized solutions that are optimally tailored to their needs. With our technical expertise and experience, we elevate your projects to the next level. Together, we create innovations that make a difference.

**Let us realize your vision together**

# Systems Solutions

## EXPERTISE

Endrich is your partner for every phase of the product lifecycle, from concept to market launch. With a comprehensive consulting service, innovative solutions, and high-quality accessories, we provide a holistic support. Our collaborations with leading partners enable us to develop customized solutions that are precisely tailored to your needs, distinguished by their versatility and quality.

## CONSULTING

- Requirements analysis and concept definition
- Material concepts
- Support with product selection
- Customised adaptations
- Solution optimisation through feedback loops

## SERVICE AND SUPPORT

- Project management from concept to production
- Support with product qualification and certification
- Technical support and maintenance services
- Training courses
- Spare parts management
- Logistics concepts

## ACCESSORIES AND ADDITIONAL SERVICES

- Assembly of the complete module
- Selection and integration of NFC, NB-IoT, Bluetooth and WLAN modules
- Calibration of the capacitive touch panel
- Audio and camera solutions
- Software integration and customisation

## CUSTOMER ADVANTAGES

- Everything from a single source
- Personalised support and direct contact person
- Extensive and in-depth market knowledge
- Cross-product expertise
- More time for your own core expertise

# Product Overview

With the constantly expanding product portfolio in the areas of Displays + Embedded, Active, Passive, Radio, Sensors, Acoustics, Lighting Solutions, Power Supplies as well as Electromechanics, endrich always offers its customers the right product for the respective application. The quality of the products is not a question of pretension, but the key to success. Who recommends quality shows that he is an expert himself.

Certifications	ISO 9001 IATF 16949	ISO 9001	ISO 9001	ISO 9001	ISO9001 ISO14001 ISO18001
General Information	High-tech company that has been dedicated to the research, development and manufacture of infrared sensors, piezoresistive silicon pressure sensor chips, SOI high-temperature pressure sensor chips, board mounted MEMS pressure sensors, pressure sensor modules, pressure transmitters and flow sensors	Azoteq is a fabless manufacturer of capacitive and inductive sensor technology with head-quarter in South Africa  The Proxsense touch sensor family enables various touch sensor applications such as buttons or sliders.  With the Proxfusion series, capacitive or inductive touch measurements are possible and, in addition, other sensors such as magnetic field sensors are integrated.	The micro vibration sensor is used to detect movements and vibrations.  Its small dimensions make it suitable for use in very small electrical devices.  It is very easy to integrate and does not require any special signal evaluation.	Amorphous silicon solar cells for indoor and outdoor use in glass, stainless steel and plastic film  The solar cells have a high degree of efficiency with good long-term stability	Since the 1970s, Micro Sensor has been involved in the research and development of pressure sensors and transmitters based on piezoresistive measuring principles
Applications	Very broad product range of PCB MEMS pressure sensors for Household Appliances, Healthcare, Automotive, Water Pumps, Air Compressors, Meteorology, IoT	Wearables, Gaming Keyboards and Joysticks, Control Panels e.g. for White Goods or Industry HMI Interfaces Bounce-free buttons	Bicycle rear light Animal Monitoring Wake-up for portable devices	Clocks Remote controls of blinds and lighting control Building Technology Energy Harvesting Applications	Process Control Intelligent Manufacturing Smart City Precision Control Specific Applications
Specifics	CO2 Sensor Module XGZG360M CO2 gas Sensor XGZG360  Thermopile Temperature Sensor XGZT263  MEMS pressure Sensors pressure transmitters flow Sensors	Touch sensors with up to 150 channels	Very small design Purely passive Noiseless	Film solar cell only 0.18 mm thick Customised solutions possible	M20 M-Series: Pressure transmitters for general industrial applications  MPM3801: Digital pressure sensor with I <sup>2</sup> C/SPI interface  MPM280AU: Pressure sensor for hydrogen pressure measurement

<b>Certifications</b>	IECQ QC080000 ISO 14064 ISO 14001 ISO/IATF 16949 OHSAS 18001 ISO 9001	ISO 9001 EN 60529	ISO 9001	ISO 9001	ISO 9001 ISO 14001	ISO 9001	ISO 9001
<b>General Information</b>	ADDA, one of the world's largest fan manufacturers, was founded in 1978 and specialises in cooling solutions with fans & heat sinks ADDA supports its customers with a large standard portfolio and customised solutions	Founded in 1976 in Taiwan. Design, production and assembly Hundreds of product combinations including: AC/DC axial, EC fans, all-metal, centrifugal and tangential fans, blowers, motors, Dust-tight, splash-proof, all IP protection classes	Ecofit was founded in 1976 in Vendôme (France) and has been part of the Rosenberg Group since 1994 From standard products to customised developments, Ecofit offers all its customers invaluable know-how based on more than 40 years of experience	Fulltech is an AC fan manufacturer from Taiwan and has been selling fans worldwide since 1990 Fulltech offers design, development and manufacture of the fans	NMB-Minebea was founded in Tokyo in 1951  With a market share of 60 % for ball bearings and the expansion of its portfolio, NMB-Minebea is one of the global players worldwide	Qianyuan was founded in 2003. The most important products are: Wire and finger protection grilles for fans, grilles for cooling systems and grills, mesh racks for white goods (roasters, ovens, etc.). oven, etc.)	Thoptec is not only a manufacturer of fastening elements for electronic components, but also supports its customers with special solutions from product planning to series production. but also supports its customers with special solutions from product planning to series production
<b>Applications</b>	White goods Cooling technology (automotive) Mini projectors Drones Industrial PC applications Industrial automation, Medical IT & Telecoms Consumer goods	Medicine Industrial drive technology Air purification Industrial trucks Food industry Home Appliance	Building ventilation Railway Dryers Filtration Refrigeration/cooling technology Wind energy Air conditioning of switch cabinets HVAC (heating, ventilation, air conditioning)	Photography lighting, Control panels, Stage lighting, White goods, LED displays, Heat exchangers, Fog machines, Power monitoring, Elevators lifts, Photovoltaic industry, Medical	Air conditioning and ventilation industry, Agricultural industry, Industrial technology, Heating & burner technology, Household appliances, Compressors, Railway, Food industry, Medical, Personal protection		
<b>Specifics</b>		IPRating + 30 days (GR-487) Salt spray-certified fan (EN60529)	125D-A ETRI fan: higher airflow, without increase in noise level; wider power range; 0 ... 10 V or PWM	EC fans Cross-flow fan fan with right-hand motor

Certifications	IATF 16949 ISO 9001 ISO 14001	ISO 9001 ISO 14001 IATF 16949 OHSAS18001	ISO 9001 ISO 14001	ISO 9001 ISO 14001 IATF 16949 medical care ISO 13485	ISO 9001 ISO 14001 IATF 16949
General Information	Founded in 1985, Diptronics specialises in the production of pushbuttons and coding switches. Strengths: Complete in-house production, Own engineering team, LED switch assembly line, Support in production and design	Since its foundation in 1981, Excel Cell Electronic has expanded its portfolio with a wide range of switches, connectors and small stamped parts. Strengths: vertical integration and in-house development	Knitter-switch has a leading position in switch technology. Extensive selection of switches, keyboards (support for customised solutions)	Win was founded in Taipei in 1978. Win now produces at two locations with an expanded portfolio. Tool and mould making as well as finishing such as screen printing, painting, laser etching	Since 1925, Marquardt has developed into a leading supplier of switches and switching systems. Marquardt attaches great importance to innovation and the development of high-quality products that fulfil the requirements of its customers
Applications	IoT, Notebooks, Smart home, Automotive, White goods, Medical, Industry, Security, Telecommunication	MMS, Household technology, Building automation, Industry, Mechanical engineering, Automotive, Medical, Safety technology, Industrial trucks	Household technology, building automation, industry, mechanical engineering, automotive, medical technology, safety technology, industrial trucks	MMS, Household technology, Building automation, Industry, Mechanical engineering Automotive, Medical, Safety technology, Industrial trucks	Household technology, Building automation, Industry, Mechanical engineering, Automotive, Medical
Specifics	Concentration on switch business, Business; further development of new technologies (smartphone, automotive and illuminated switches)		ICE series: switch series for industrial control that fulfils all relevant safety regulations

General Information	Huber+Suhner is a globally active Swiss company specialising in the development and manufacture of components and system solutions in the field of electrical and optical connection technology. The main areas are radio frequency, low frequency and fibre optics.	WERMA Signaltechnik is a German company that develops and produces optical and acoustic signalling devices.  The company was founded in 1950
Applications	High frequency: Communication technology Mobile radio Aerospace Aerospace defence Measurement technology	Manufacturing and production plants Mechanical and plant engineering Automation technology Logistics and material flow Building technology and security systems

# Customized Cable Assemblies

Endrich offers customized cable assemblies tailored to your specifications, manufactured by our partners. Your assemblies are produced with consistently high quality on modern, efficient, and precise fully- and semi-automatic machines, as well as cutting and assembly devices. Before delivery, they are tested using various methods according to your requirements. Customer-specific components can be integrated into the assembly.

Versions	Processing techniques	Testing techniques
Single wires	Crimping technology, press connections	Polarity testing
Flat ribbon cable	Soldering technology	Short circuit test
Coaxial cable	Ultrasonic welding	Length check
Wiring harnesses	Potting technology, hotmelt	Micrograph inspection
Sheathed cables (shielded and unshielded)	Device installation	Trigger force measurement
	Automatic bandaging	Crimp force monitoring

Assembly examples:

Amphenol C16-3 device connector with individual wires and D-SUB sockets 	Flat ribbon cable 	Hummel hybrid connectors with cable and wires 	Amphenol M16 device socket with flat cable 
M12 pre-assembled 	RJ connectors and Molex Micro-Fit 	Ultrasonic welding of copper wires 	Solar connectors

Certificates	ISO 9001	ISO 9001 ISO 14001	ISO 9001 ISO 14001	ISO 9001
General Information	As the undisputed market leader in LED optics, LEDiL firmly believes in the right light for enhanced well-being and safety, optimized functionality, and improved sustainability through energy efficiency	Since 1899, Bender+Wirth has been supplying the lighting industry with components of the highest quality worldwide  Their current product portfolio includes LED holders, LED connectors and lamp sockets	Cooliance is a global company that develops and manufactures a wide range of reliable thermal solutions and heat sinks	Celera is a technology company that provides solutions in the form of products and services for the thermal management of electrical and electronic devices across various industries and applications, including computers, smartphones, LEDs, and electric vehicles
Applications	Indoor Lighting Outdoor Lighting UV Horticulture Street Lighting	General Lighting	General Lighting Customised Solutions	LED Module General Lighting Industry Sensoren
Specifics	New series DAISY, STRADELLA, LISA Zhaga Standard	COB holder for UV-C: Series 430 made from a UV-resistant mineral	Zhaga Standard Customised adaptations	High heat dissipation High flexibility and adaptability Excellent mechanical and chemical stability

## Features

<b>Certificates</b>	IATF 16949 ISO 14001 AEC-Q200	IATF 16949 ISO 14001 AEC-Q200 OHAS 18000 AS9100	IATF 16949 ISO 14001 AEC-Q200	ISO 9001 ISO 14001 IATF 16949
<b>General Information</b>	Inventor and leading manufacturer of polymer technology, known for its long lifespan and compact size  In the field of hybrid capacitors, Panasonic ranks among the top three manufacturers in the global market	PDC is the only Taiwanese manufacturer of MLCCs with true manufacturing depth, from ceramic powder to the production of finished products  They specialize in unique requirements such as: High voltages: up to 10 kV High capacitance: up to 330 $\mu$ F Tight tolerance: up to +/- 1% For safety-critical applications: X1/Y2, X2 Large packages >1210 Additional features include low ESR, soft termination, AEC-Q200 qualification	A large portfolio of SMD electrolytic capacitors and polymer hybrid capacitors  As a pioneer in polymer hybrid capacitors, which combine the advantages of wet electrolyte and solid capacitors, SUNCON offers the third generation of its EP-CAP capacitors  Benefits include very high ripple current capability, lowest ESR values, long lifespan, and usability at very high temperatures up to +150°C	Walsin is among the top five manufacturers of multilayer ceramic capacitors (MLCC) in the global market  The product range includes standard components as well as optimized versions for specific applications, including those focused on miniaturization
<b>Applications</b>	Automotive Smart Industry Smart Products Medical	Automotive Smart Industry Smart Products Medical	Automotive Smart Industry Smart Products Medical	Automotive Smart Industry Smart Products Medical
<b>Specifics</b>	Voltage extension for POSCAPs up to 50 V  Ultra-low SP-cap with 3 mOhm.	Specifically suitable for large packages and high voltages	The FVF series is suitable for universal applications due to ripple current tables for use at different maximum temperatures  The FVS series is referred to as semi-bipolar and offers resistance to short-term negative voltage up to -16V  Expansion of the housing to a diameter of 18mm and a height of 20mm for SMD electrolytic capacitors.	Specifically suitable for custom large-scale projects or logistics systems.

# Resistors

Manufacturer	E&C	PDC	RCD	Susumu	Walsin
Thin Film Resistors				■	■
Shunts		■	■	■	■
Thick Film Resistors		■	■		■
Special Resistors	■	■	■	■	■

## Features

Certificates	ISO 9001	IATF 16949 ISO 14001 AEC-Q200 OHAS 18000 AS9100	ISO 9001	ISO 9001 ISO 14001 IATF 16949	ISO 9001 ISO 14001 IATF 16949
General Information	Specialized in high-resistance resistors in the range of Mega to Peta Ohms, for voltages up to 750,000 VDC Custom products available	Thick-film resistors optimized for specific applications Surge resistors with 2- or 3-times rated power High-voltage and safety resistors with UL certification	The largest selection of resistors from the following categories: thick-film, thin-film, wirewound, ceramic, metal glaze, and metal oxide Resistors are available in various forms, including chip, MELF, THT, radial, axial, as well as with or without heat sinks	Thin-film chip resistors with excellent long-term stability, as well as ultra-precision networks for use as voltage dividers Metal foil shunts with terminals on the short and long sides High-frequency products such as attenuators, termination resistors, and splitters	Walsin is among the top five manufacturers of thick-film resistors in the global market The product range includes standard components as well as optimized versions for specific applications, including miniaturization, high power ratings, and high voltages
Applications	Smart Industry Smart Products Medical	Automotive Smart Industry Smart Products Medical	Smart Industry Smart Products Medical	Automotive Smart Industry Smart Products Medical	Automotive Smart Industry Smart Products Medical
Specifics	The HC series refers to some of the smallest high-ohm chip resistors available on the market Package 0402 is available up to 150 G Ohm	Chip resistors with lead content <100 ppm, making them RoHS compliant without exception	CM300 Type – ultra-flat 300 Watt power resistors with a proprietary flame-retardant protective coating When combined with appropriate air or water cooling, the CM300 delivers optimal performance	Custom products available Chip attenuators for frequencies up to 50 GHz Thin-film resistors with up to 7.5 Megaohms	Specifically suitable for custom large-scale projects or logistics systems

# Inductive Components

Manufacturer	ABC	Inpaq
Power Chokes	■	■
Iron/Metal Core	■	■
Filter	■	■
Chip	■	■

## Features

Certificates	ISO 9001 ISO 14001 IATF 16949	ISO 9001 ISO 14001 IATF 16949
General Information	<p>Wide selection of SMD and THT</p> <p>Inductors for applications such as DC/DC converters or as filter chokes in bus systems</p> <p>Despite focusing on automated production, ABC maintains significant flexibility, resulting in small minimum order quantities (MOQ) and reasonable delivery times</p> <p>While holding over 100 patents, ABC also offers many products in standard market configurations</p>	<p>Inpaq offers inductors for RF and DC applications, such as chip ferrite beads, filters, and chokes, using technologies like multilayer, wire-wound, and thin-film</p> <p>Inpaq is one of the largest manufacturers of miniature inductors. The WIP series has a monthly output of 600 million units</p>
Applications	Automotive Smart Industry Smart Products Medical	Automotive Smart Industry Smart Products Medical
Specifics	ABC is capable of producing semi-customized and customized inductors and transformers	Inpaq's WIP series is referenced by Qualcomm for the Snapdragon platform

General Information	Location: Wenzhou/China, founded: 1986  Baolong specialises in micro vibration motors and micro drive motors. Customised adaptations possible. Advantages: Long service life, small size, light weight, low energy consumption	BSE was founded in 1987 in Incheon, South Korea.  Founded BSE develops and produces acoustic solutions, primarily microphones	Chinasound develops and produces piezo components, buzzers, including warning buzzers and Mylar loudspeakers in Changzhou, China	Qinlon was founded in 1994  Development and research of electro-acoustic components such as loudspeakers, buzzers and ultrasonic sensors. One of its strengths is the combination of applications and suitable acoustic technology	Company in China, founded in 1996 Manufacturer of electro-acoustic components such as buzzers, loudspeakers and microphones High quality can be guaranteed thanks to professionalism and many years of experience	Locations in Foshan and Shanghai  Broad product range of loudspeakers and microphones (ECM technology: conventional and reflow solderable)  Customised solutions
Applications	Mobile phones Fitness watches E-cigarettes Electric toothbrushes Switches and control panels (haptic feedback)	Smartphones MP3 players Computers Communications Automotive	Piezoelectric warning buzzers and sirens for fire protection and security systems Household appliances Payment systems (POS)	Automotive Intelligent household appliances	Automotive Household appliances Communication Consumer industry	Computer industry Telecommunications Automotive Consumer industry Household appliances
Specifics	Smallest SMD Vibration motor BLT-3211H, small disc-shaped vibration motors 0720 & 0625, LRA vibration motors 0832 & 0412	Receiver loudspeaker	Customised piezoelectric warning buzzer SMD loudspeaker	Own research institute for the continuous automation of production to promote product quality	Customised solutions	Water-protected speakers, microphones and receivers (up to IP67), Speakers in small enclosures, SMD speakers
